

# SUBJECT EXPRESSION VARIATION IN SPANISH SECOND LANGUAGE LEARNERS: A CORPUS STUDY

8<sup>th</sup> International Workshop in Spanish Sociolinguistics, San Juan, Puerto Rico.

Falcon Restrepo Ramos | Department of Spanish and Portuguese Studies

**UF** UNIVERSITY of  
**FLORIDA**

# What has been done recently in the literature?

- a. L2 subject expression (SE) variation (Geeslin et al., 2008; Geeslin et al., 2015, Linford and Shin, 2012) and bilingual children (Silva Corvalan, 2015)
- b. In heritage speakers (Montrul, 2004)
- c. And monolingual children (Ballester, 2010; Montrul et al., 2015, Shin et al., 2015)

# Interesting previous findings

1. Geeslin et al. (2015) – U-shaped pattern of SE development

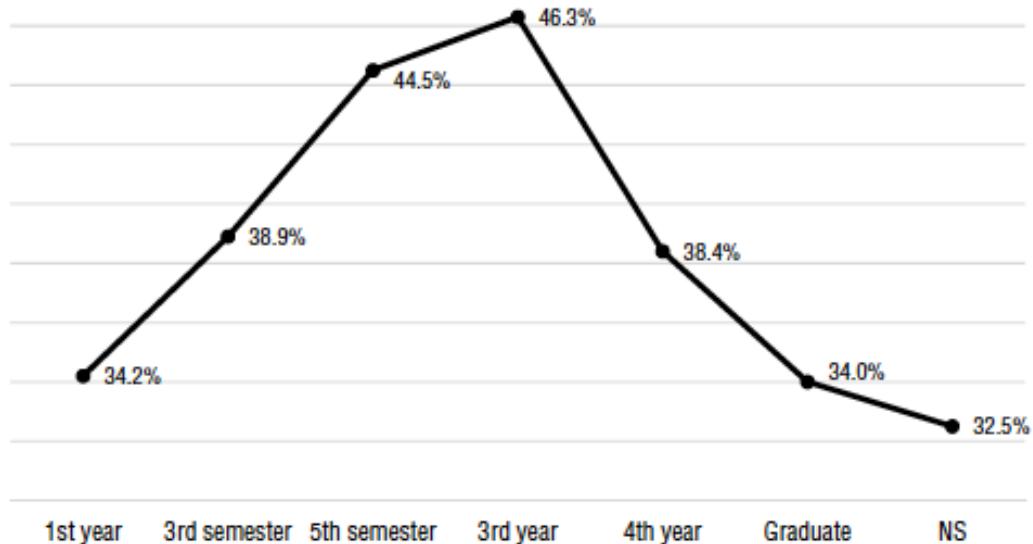

Figure 10.1 Rates of overt subject pronoun selection by group

# Interesting previous findings

2. Geeslin et al. (2013, 2015), Shin et al. (2015), Orozco (2015), and Otheguy et al. (2015) - Linguistic factors conditioning the use of subject expression according to individual differences:

## **Internal factors**

Person

TMA and TMA continuity

Specificity of the referent

Verb class

## **External factors**

Proficiency and gender

# Elicitation tasks previously used:

- (1) Sample item taken from the WCT:

**Pedro:** *Bueno yo estaba seguro que él no sabía a dónde iba pero cuando le pregunté, ...*

- ... me dijo “¡Claro que sí! ¿No confías en mí o qué?”*
- ... él me dijo “¡Claro que sí! ¿No confías en mí o qué?”*

Coded as switch reference, preterite, same TMA (continuity), and 3sg. (Geeslin et al., 2015: 196)

# The purpose of this study

What?

Sociolinguistic factors influencing the variable use of SE in our Spanish L2 learners across levels of proficiency

Why?

To go further into the SE developmental path

How?

Novel usage-based approach

# Research questions

According to subject pronouns and NPs (SE) selection across levels of proficiency:

- a. How SE selection rates differ in the written compositions of L2?
- b. Which linguistic variables predict the rates of selection of subject pronouns and referential NPs?

# Data

A novel approach in L2 SE variation:

Final draft of the first in-class composition assignment of the semester collected in-class.

- No instructor's feedback was made regarding subject expression.
- Learners upload an electronic version to MySpanish Lab platform and Qualtrics.

## Sample

VIVA  
DATA

Topic: Write a letter (minimum 150 words) to a friend back home about [...]:

Mi amiga Nicole también la te gusta estudiar en el estadio. Ella tiene veintidós años, es atlética, trabajadora, bonita, y inteligente. Mi amiga Taylor tiene veintiuno años, es cómica, simpática, perezosa y interesante. [1130BSpan1#4, female]

Topic: Last night you helped with a fashion show/dinner to raise money for Accion callejera (180 words on average) [...].

[...] los niños y yo fuimos al supermercado para comprar comida [...]. Necesitamos comprar todo para servir a los clientes durante el desfile. En la mañana, nosotros empezamos cocinando. [1131BSpan2#4, female].

Topic: Ustedes van a escribir un folleto (brochure) para los nuevos estudiantes con información sobre las actividades que pueden hacer en su tiempo libre (250 words on average). Esperemos que quieran hacer algo diferente, interesante, y vacano. ¡Tenemos el lugar para ustedes! Si quieres ser un/a mejor atleta o si quieres descubrir una nueva actividad que te gusta, tenemos algo para todo. [2200ISpan1#10, male].

Topic: Te vas a casar este año y quieres planear los detalles de: ¡tu boda y tu luna de miel! (250 words on average) Un poco tarde, el llegué al club en que mis amigas y yo estábamos en para conocerme. Hemos sido inseparables desde dicha noche. El es tanta cómica y tiene una actitud muy positiva. También, es un trabajador duro en sus estudios como yo. De hecho, estudiamos a juntos a veces. [3700ASpan#4, female].

# Participants

- 57 native English speakers from the US learning Spanish as their L2 and enrolled in 3 different levels of Spanish courses at UF. Five native speakers served as the control group.

Speaker Type	L2ers				Control
Proficiency	Beginners 1 (1130)	Beginners 2 (1131)	Intermediate 1 (2200)	Adv. L2ers (3000)	Native
N	16	16	16	9	5

# Coding and Variables

## Internal factors

Person

TMA

TMA continuity

Switch Reference

Verb class

Clause type

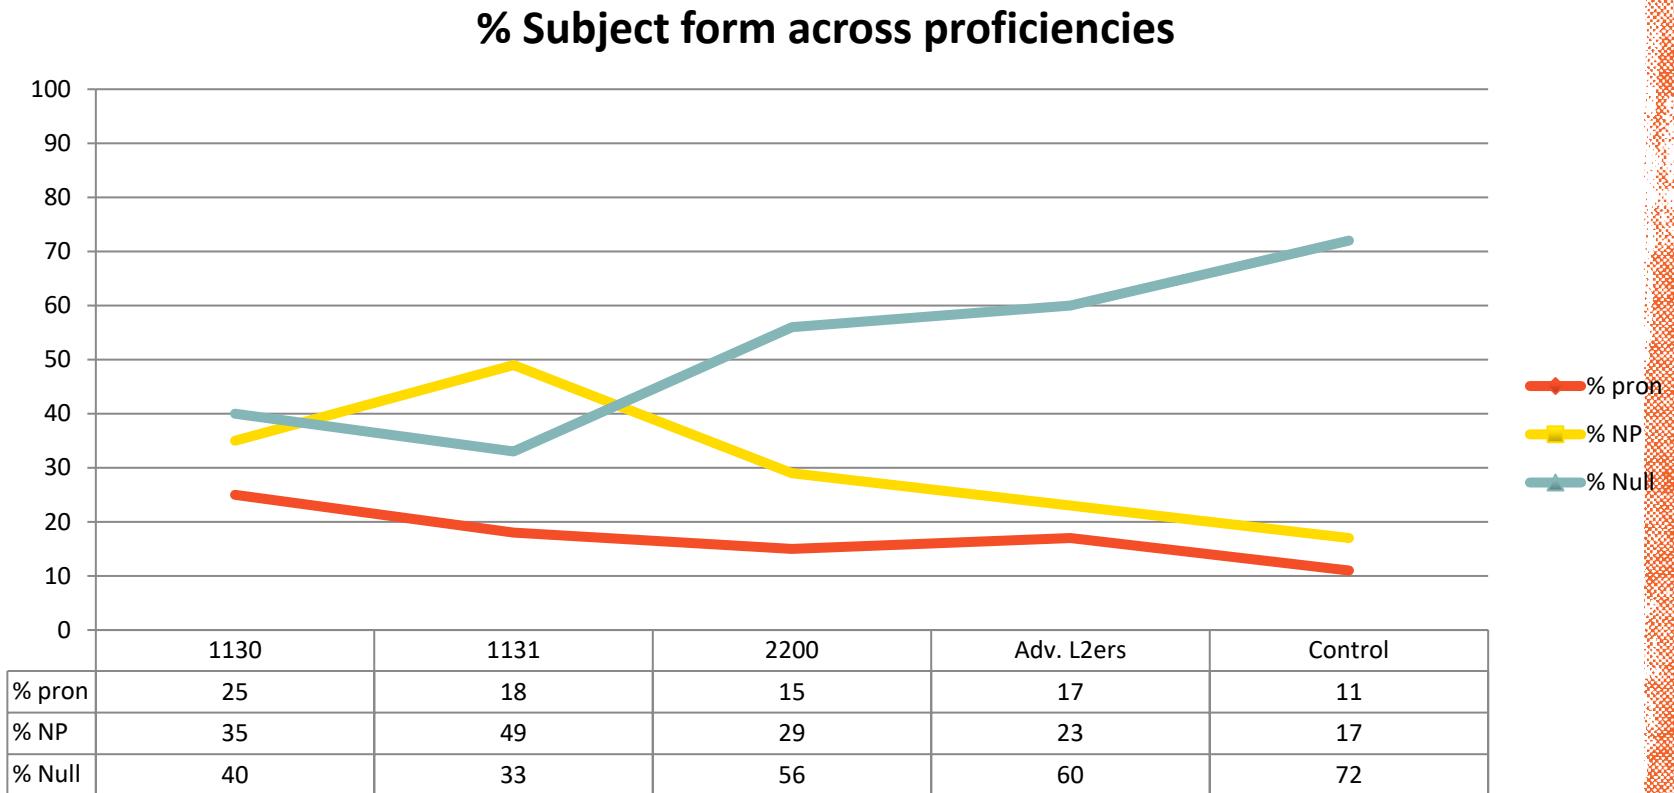

## External factors

Proficiency and gender

**Binary dependent variable:** a. Overt subject pronoun vs null  
b. Overt Np vs null

Multivariate analysis application Goldvarb X 3.0

# Overall Selection Rates: 1661 tokens

**Beginners 1**

TMA Continuity					
Clause Type					
Verb Class					
Gender of Participants					

\* > .70 weight

\*\* > .84 Weight

# Research Questions Revisited

- According to subject pronouns and NPs (SE) selection across levels of proficiency:
  - a. How SE selection rates differ in the written compositions of L2?

Results: selection rates differ on the type of subject (Nulls > NPs > Pronouns). No u-shaped pattern found

- b. Which linguistic variables predict the rates of selection of subject pronouns and referential NPs?

Pronouns: Person > TMA > Switch Reference > Gender

NPs: Switch Reference > Person > TMA

# Conclusions

- The developmental path across all the levels of proficiency seems to be constrained by the L1 at beginning levels and follows a regular path of acquisition to reach native like proficiency. This finding is not consistent with previous models (Geeslin et al., 2015).
- Switch reference, person, TMA appeared as highly predicting factors of NPs subjects.
- In beginners, the *person* factor seems to be the only factor predicting the selection of subject pronouns.
- Finally, the usage-based approach promises to further delve into the research field of L2 subject expression.
- Tentatively, male participants tend to favor the use of pronouns at higher levels
